CPP REAL AI NEOCLOUD

Infrastructure. Anywhere.

# The Real AI NeoCloud

Secure, air-gapped, cloud-like AI infrastructure that runs entirely inside your security boundary, delivered by CPP from the first assessment through day-two operations.

Federal & Defense | Financial Services | Highly Regulated Commercial | Mission Critical Applications

## From assessment to operations

**01 · ASSESS**
### AI Readiness Infrastructure Assessment
Where every engagement starts: workloads, data, security and compliance needs, and current infrastructure.

**02 · DESIGN**
### Air-gapped, cloud-like architecture
A+B redundancy, sized to the workload and ready to grow.

**03 · IMPLEMENT**
### Production-ready, built with trust
Secure U.S. supply chain, installed by personnel with the highest level of security clearance.

**04 · MANAGE**
### Operate, monitor, evolve
Keep the environment secure, reliable and ready to scale as AI workloads grow.

## Built on leading partners

**HPE Compute**
AI-ready compute and GPU infrastructure.

**HPE Networking**
Secure, high-performance networking.

**HPE AI Storage**
AI-ready storage for fast, protected data.

**NeuralSeek**
Governed, no-code AI platform that can run fully air-gapped.

**Fortinet**
Network and security protection across the environment.

**EigenQ**
Post-quantum cryptography to protect sensitive data long term.

**11:11 Systems**
Data protection and recovery to support resilience.

### Secure U.S. supply chain
Confidence in where every component comes from.

### Cleared personnel
Implementation by staff with the highest level of security clearance.

### A+B redundancy
Independent A and B paths in every design.

### One accountable team
Assess, design, implement and manage under one roof.

**Start with an AI Readiness Infrastructure Assessment.**

WHO WE ARE

CPP Associates is a New Jersey-based IT Solutions and Services firm, founded in 2008 with deep HPE roots. We help organizations assess, design, implement and manage infrastructure for what comes next.
